

Sliding Valve Metal-to-Metal Seat

MANUAL VALVE

3", 4", and 6" ID

The Betts sliding valve is an economical manually operated external stop valve that provides a quick open or close function. The 316 stainless discs offer premium corrosion resistance and the adjustable packing nut with woven PTFE infused packing allows for easy stem adjustments. The metal to metal seal has advantages for many applications, but is susceptible to wear and scratches. If a maintainable seal valve is required, please see Betts line of replaceable o-ring seat sliding valves (Section 17 Page 4A).

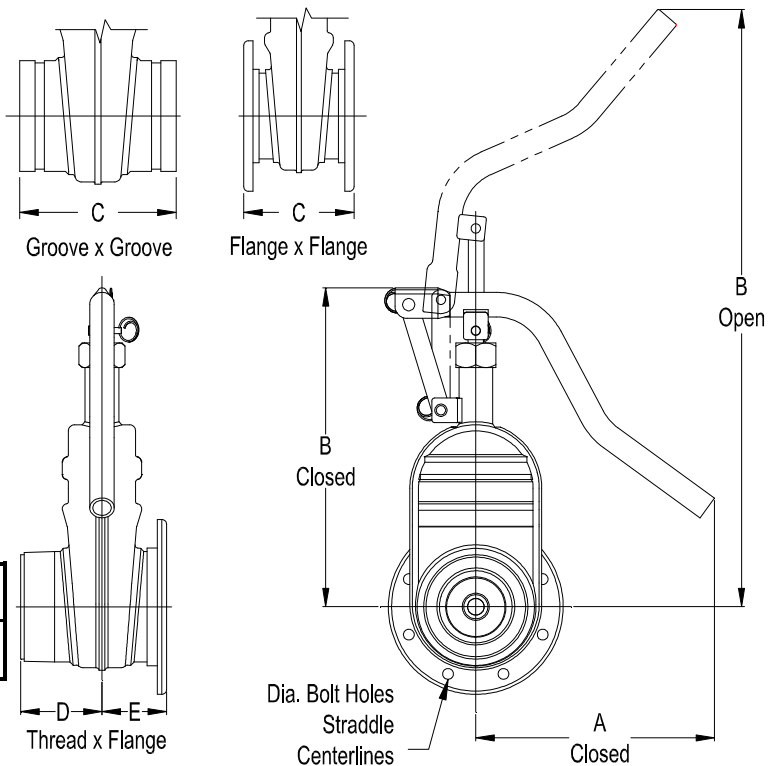

Add suffix "J" to Part No. for heat tube version. See section 17 page 1B for details.
(Heat tube MAWP = 150 psi)

Body Material	Valve MAWP**	Min. Burst Pressure	Temp. Range
Steel or Stainless	50 psi [3.4 bar]	200 psi [13.8 bar]	-40°F to 500°F [-40°C to 260°C]

NOTE: Valve should NEVER be heated with flame

See section 17 page 1B for parts list.

Flange bolt pattern per TTMA recommendations and grooved outlets per MIL-C-10387B.
